

Kenneth Zaiken, PMP Biography

Technology Visionary and Strategist with 27 years experience in the software industry. Proven record of building development teams that delivered new and

innovative solutions to the marketplace. Extensive managerial experience from VP level coordination of multiple laboratory locations and disciplines (such as services and support), to 1st line development oversight. Experienced in establishing, leading, and directing cross-functional teams within a distributed development environment. Key influencer in the Business Continuity marketplace for 18 years. Has worked with scores of complex customers defining their Business Continuity implementation and in the process contributing to their technical and IT strategy. Author of seven patents

Data Protection Quick Assessment

Several day assessment using a questionnaire format addressing Data Protection basics regarding:

- Mission Critical Applications
- Downtime Costs
- Requirements
- Tools
- Processes
- Testing

Business Continuity Assessment

This service is the natural follow-on and complementary offering to the Data Protection Quick Assessment. Business Continuity looks beyond the data center and focuses on the business processes and non-data center aspects from a continuity standpoint. Additional items reviewed include:

- Personnel
- Logistics
- Telephony
- Minimal Running Requirements
- Disaster Recovery Planning
- Critical Continuity Success Factors

The assessment is onsite and encompasses several weeks to complete.

Project Status Assessment

For any organization that desires an outside review of the current status of an ongoing project towards meeting its objective. Assess the current status of a project using a combination of the 5 formal areas defined by the PMI® PMP process and supplemented by other lessons learned by Ken Zaiken, PMP, through his years of experience in driving projects. This is a several week on-site assessment.

Software Development Organizational Efficiency Assessment

For any software organization that desires an expert outside review of their Software

Organization due to missed dates or perceived quality issues. Assessment will focus on the keys areas of Requirements Management, Metrics, Process, and organizational reporting effectiveness for design, test, and development.

This is a several week onsite assessment..
